

International Summer School on Sustainability 2023

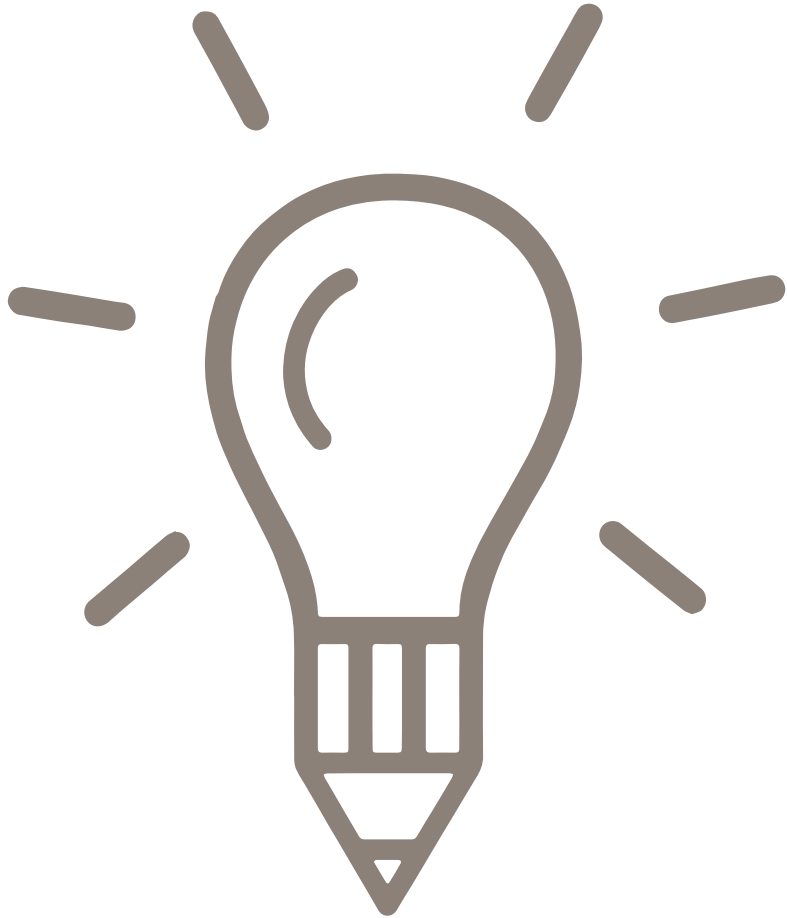

Come and join our International Summer School on Sustainability (ISSS)

50:50	Equal focus on theory and practice	
30	International students	
03	Real life challenges	
6+	Professors and experts on sustainability	

- Students will work on real-life projects, and profit from virtual and in situ input sessions. They will learn to cooperate in teams, and create goal-driven solutions.
- We will encourage 'thinking outside the box', and looking for realistic, application-oriented results.
- 30 international students, 1 company, 3 professors, an organizational support team, and several experts on sustainability and key skills for project management and teamwork come together to learn, experience, share, and implement sustainability concepts.

Your ISSS benefits

01 in-depth theoretical and practical knowledge about sustainability

02 real-life project work

03 social skills with a focus on multicultural teamwork, creativity and presentation skills

04 no fees, even accommodation and many meals are included
